

PVS TV Systems
Custom Brackets

PVS prides itself on providing cost effective solutions when it comes to adapting older systems to new. Through our many years of installation and retro fitting, we have seen just about every type of CRT roof mount and been able to adapt in an aesthetically pleasing way to suit a new flat screen panel.

Each PerfectVision roof mount adaptor provides both tilt and pan to optimise the patient viewing angle. The adaptors and bracket has been designed to match the screen location of the existing CRT.
