

Nurse Call Systems
Nurse Call Overdoor Light

PVS PVNC04

The PVS PVNC04 Nurse Call Overdoor Light unit is designed to accompany the PVNC09 master point for local indication of nurse call status.

The ODL allows monitoring of up to 6 local master units, with priority indication of Emergency, Assist, Nurse Call and Presence states.

The PVNC04 features super-high brightness LEDs coupled to a custom frosted acrylic wedge which allows high-visibility from over 20m from the unit.

The PVNC04 may also be connected to a speaker or buzzer for local alert, should the system be stand-alone without PVS Flexicall Annunciators and Public Address output.

Basic Specifications

Options	Speaker/Buzzer for local alert
Connections	1 x RJ-45 for connection to PVNCCU controller
Optional	speaker output Terminals for connection of 6 PVNC09 Masters
Operating modes	Nurse Call (Yellow) Assist (Flashing Yellow) Presence (Green) Emergency / Code Blue (Red)
Mounting	Clipsal 2000 series
Power supply	12V DC, 9mA (standby) 150mA (max)
Dimensions (WxHxD)	117mm x 76mm x 100mm
Weight	120g
