

Nurse Call Systems
 Programmable Nurse Call Master

PVS PVNC09

The PVS PVNC09 Nurse Call Master point is a field-programmable unit expandable by the addition of slave and handset points.

The PVNC09 master is designed to interface with the Curbell Gen 4 handset, offering unsurpassed patient entertainment and nurse call integration.

The PVS PVNC09 features selectable Nurse Call with Assist or Emergency call point operation and indication* and provides assurance back-lighting and positive action mechanical switches for piece of mind.

When used with a compatible handset, multiple pull-out and over-bed light options are supported.

* May require decal replacement.
