

Nurse Call Systems
Multi-system Nurse Call Interface

PVS PVNC11

The PVS PVNC11 Nurse Call interface wallplate is a field-programmable unit designed to interface to a range of Nurse Call systems, televisions and over-bed light relays.

The PVNC11 is designed to interface with the Curbell Gen 4 handset, offering unsurpassed patient entertainment and nurse call integration.

The PVS PVNC11 features Nurse Call call point operation and indication* and provides assurance back-lighting and positive action mechanical switches for piece of mind. When used with a compatible handset, multiple pull-out and over-bed light options are supported.

* May require decal replacement.
