

Nurse Call Systems Programmable Nurse Call Slave

PVS PVNC12

PVS PVNC12 Nurse Call Slave point is a field-programmable unit designed to mate with the PVNC09 Nurse Call Master point.

The PVS PVNC12 features selectable Nurse Call, Assist, Presence or Emergency call point operation and indication* and provides assurance back-lighting and positive action mechanical switches for piece of mind.

All PVS slave units can be daisy-chained or connected in parallel to accommodate the cabling requirements of the installation and use standard RJ45 fittings for simple replacement.

* May require decal replacement.
